

# OVEP : Over-Fascia Vented Eaves Protection

A further development of eaves protection comes in the form of the innovative 'one-piece' eaves protector combined with an integrated over fascia ventilator and bird comb.

The 'one-fix' system is provided by an upstand on the underside of the eaves protector, which sits on the top edge of the fascia board, which is supplied with a 10mm continuous vent.

Known as a **'2 in 1' System**, used with Flat Tiles and Slates.

The provision of a fixed bird comb creates an effective barrier against birds and large insects, which is known as a **'3 in 1' System**, used with all Profiled tiles.

## Installation: New Build

The OVEP is located onto the top of the fascia board, ensuring the stop beads, below the vent, are rested against the front face of the fascia board. When using a slate or flat tile, where a comb filler is not required, the OVEP is fitted using a minimum 50mm corrosion resistant fixing through the nail/screw ports, ensuring both ends are securely fixed. Locate the OVEP onto the interlocking section of the previous board, fixing in place. Continue this process along the whole length of the eaves.

## Installation: Existing/Retro Fit

For refurbishment work, the installation is very similar. Remove or lift the eaves course and make good any damage to the rafters and underlay. The OVEP is fitted in place as above, and the existing underlay relayed on the OVEP. The tiles or slates are the replaced.

|                    |  |
|--------------------|--|
| <b>SIZE</b>        | 1000mm long x 200mm cover width  |
| <b>MATERIAL</b>    | UV stable polypropylene, 100% re-processed   |
| <b>PACK SIZE</b>   | '2 in 1' - 40 per box    '3 in 1' - 20 per box   |
| <b>REGULATIONS</b> | NHBC requirements: Complies with BS5250: 2002  |
| <b>BENEFITS</b>    | Combined Vent and Felt Support Tray, Strong, Durable, 15 year guarantee, Suitable between 15 & 70 deg. pitch |
